General information

- The purpose of the conference is to provide a platform for discussions about the role of digitalization in the development of financial services.
- The event focuses on an economic and managerial perspective, bringing together professionals from the financial field, including theorists and practitioners, to analyze the impact and opportunities of digitalization in financial services.

The topics of the conference

- MiCA Regulations and their impact on digital financial markets;
- Fintech: Opportunities and constraints
- Innovation vs. compliance: How financial markets are adapting to new regulations;
- The role of artificial intelligence, blockchain and smart contracts in transforming the financial industry;
- The impact of new European regulations on consumers: accessibility, security, and costs;
- DORA and digital operational resilience in the financial sector.
